We are looking forward to welcoming you again to our popular workshops very soon.

The anatomical workshops are targeted at those of you who are looking for an advanced immersion and refresher of the functional anatomy and ultrasound-guided injection techniques of dystonic patients.

You will be introduced to the product and its methods of action, practice ultrasound-guided functional anatomy as well as review the anatomy in the wet lab and practice injecting on human specimens. Our experts will answer your questions and guide you through the pearls and pitfalls of Botulinumtoxin to solidify your confidence in your daily practice.

Time	Presentation
08:30 - 09:00	Doors open & registrations
09:00 - 09:30	Upper limb (functional anatomy and important landmarks)
09:30 - 10:00	Ultrasound-guided injection techniques – practical considerations
10:00 - 10:15	Coffee break
10:15 - 12:00	Ultrasound hands-on session
12:00 - 13:00	Lunch
13:00 - 16:00	Hands-on wet lab – injection techniques on the human specimen
16:00 - 17:00	Q&A, summary, closing remarks
