Dear Migraine Experts,

We are excited to invite you to our next interactive workshop on modern migraine therapy. The focus will be on current pathophysiological concepts, evidence-based therapy decisions, and practical aspects of patient management. In addition to concise expert presentations, the workshop will also provide room for discussion and collegial exchange.

Objectives

Critically assess the differences between botulinum toxin and CGRP-based therapies.

Discuss evidence-based approaches to early prophylaxis and patient eligibility assessment.

Use monitoring strategies in a structured and targeted way in everyday clinical practice.

Reflect on typical challenges and therapeutic pitfalls in everyday clinical practice.

Key aspects of PREEMPT* injection techniques and insights into CGRP therapies.

PREEMPT: Phase 3 REsearch Evaluating Migraine Prophylaxis Therapy, CGRP; Calcitonin Gene-Related Peptide, CME; Continuing Medical Education, SNG; Swiss Neurological Society | *Aurora SK, et al. OnabotulinumtoxinA for treatment of chronic migraine: pooled analyses of the 56-week PREEMPT clinical program. Headache. 2011 Oct;51(9):1358-73.
