Join the experts for the **second episode of the Neurology Webinar Series: Mastering Headache & Migraine**, as we continue our series of interactive webinars into 2026.

Dear Professor, Dear Doctor,

The management of migraine and headache remains a complex and multifaceted challenge in neurology, especially when navigating particularly difficult patient profiles. Achieving optimal outcomes requires both a thorough understanding of established guidelines and the application of innovative management strategies.

We are delighted to invite you to the second episode of our interactive webinar series. **Join Prof. Patricia Pozo-Rosich and Prof. Dr. med. Chiara Zecca as they share their expertise on the management of challenging migraine cases.** This session will focus on complex patient cases and advanced patient-centered approaches, providing insights from both Swiss and international clinical practice.

We very much look forward to your participation.
